

OBSOLETE - DISCONTINUED & EOL Parts Updated Information

Dear:
Technical Support, Engineering and Customer Service.

The purpose of this letter is to **update** and **add us to your component referral list**.
We are on some of your lists already, however some of our information has changed.

By referring the **Part Search Site** and company to purchasing agents and engineers worldwide will create and establish a win/win relationship. Providing your Technical support staff, component divisions and service departments with procurement/sourcing tools.

Referring and communicating to your customers, will help them source and procure:
Obsoleted / Discontinued / EOL and hard-to-find components in your manufacturers brand in a timely manner.

We continue to increase our inventory and purchases of your quality parts.

To find your components please go to: **www.otxi.com**
